

2101 G+H

- 2-jaw power chuck without through-hole
- High centering accuracy
- Long jaw stroke
- Max. pulling force - 30kN
- Max. clamping force - 80kN
- Suitable for clamping irregular shaped workpieces. Can be clamped on special jigs or individually
- Suitable for vertical operation thanks to the use of covers and seals, thereby preventing the entry of chips and dirt

* All dimensions on the drawing are in [mm]

Code No.	Type	Max. pulling force [kN]	Max. clamping force [kN]	Weight without top jaws [lbs]
7-754-1000	2101-215 G+H	30	80	47.40
