- Simple and compact design provides for three types of indexing:
 - 1) basic indexing - which is done by means of catch device in 2, 3, 4, 6, 8, 12 and 24 divisions
 - 2) angular indexing - which can be performed through sleeve with scale graduated in 360° in 1° increment
 - 3) alternative indexing - which can be performed by means of catch device and specified changeable dividing plate (with Z=13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23 or 24 units number of divisions). To obtain required number of divisions replace Z=24 plate with one of the above specified plates.

- Indexing accuracy 2'
- True run-out of tapered centre bore 0.02mm
- Squareness (base to chuck) 0.02mm
- Parallelism over face 0.02mm
- Concentricity of mounting flange with precision or standard chuck 0.03÷0.06mm
- Dividing plate made of high-quality alloy steel, hardened and ground
- Body made of cast iron
- Chuck not included

Please select an appropriate chuck:
